Important Screening

Mammograms are a covered benefit

Mammograms are a covered benefit for women based on their age and risk factors for breast cancer. They help detect breast cancer, even when you don't have any symptoms. If you're due to get one, don't wait. Schedule this important screening today. It has saved the lives of hundreds of thousands of women. It could save your life, too!

Knowing how your breasts normally look and feel can help you notice symptoms of breast cancer. Possible signs include lumps, pain or changes in size. To learn how you can do a breast self-exam at home, visit [uhc.care/healthtalkexam](https://www.uhc.care/healthtalkexam).

Annual Wellness Visit

Health in your hands

Annual wellness visits are important for good health

Preventive care tells you about your health before it gets bad. It is a covered benefit under your health plan. It includes regular visits to your primary care provider, screenings and vaccines.

All members of your family should see their primary care provider once a year for an annual wellness visit. These visits keep your family healthy. They can find and prevent problems before they happen.

Visit myuhc.com/communityplan to find a provider.
