What's inside

It's time for your annual flu shot. Our flu shot location finder makes it easier to find where to get one. Learn more on Page 3.

Health coverage

Choose how to renew

What you need to do to renew your MO Healthnet benefits

Online: When your renewal is due, create an account for the Family Support Division (FSD) portal at my.mo.gov/fsdbenefits. Then, complete and submit your form. You can also upload a copy of your completed and signed annual renewal form to the FSD.

By phone: Call FSD at **855-FSD-INFO (855-373-4636)**.

In person: Visit a local FSD office. Be sure to take needed documents with you.

By mail: Complete the form mailed to you and return it to the FSD.

Breast cancer screening

Be your best self

Take time to get a mammogram

For women, it's important to get a mammogram when your health care provider says you should. A mammogram is an X-ray of the breasts that can help find breast issues. It may help find breast cancer early, when it is easier to treat.

Taking care of your health is important. It is not selfish. Plus, being healthy helps you take care of your family.

Getting a mammogram can save your life. It is a covered benefit for women based on your age and risk factors. That means you can get one at little or no cost to you.

Take care. Talk to your health care provider about if you should get a mammogram. To learn more about your mammogram benefits, call Member Services toll-free at the phone number on Page 4.

Depression

Feeling down?

You don't have to

Depression is more than feeling blue for a few days. It is a serious mental illness. Some signs include:

- A sad mood that doesn't go away
- Not wanting to do things you once enjoyed
- Eating much more or less than you used to
- Trouble sleeping or sleeping too much
- Lack of energy
- A hard time thinking
- Thinking about death or suicide

Depression can be treated. Medication can help. So can therapy. You can also try lifestyle changes. Exercising, getting enough sleep and eating healthy may improve your mood.

Get help. If you have symptoms of depression most of the time for more than a few weeks, talk to your primary care provider (PCP).

Chronic conditions

Have a plan

Understanding your asthma treatment

Asthma is caused by inflamed airways. This can make it difficult to breathe. While there's no cure for asthma, proper care can help you live a normal life. If you have asthma, it's important to follow your doctor's orders.

A written asthma action plan can also help you understand your asthma care. It can also make treatment easier. It should tell you what medicines to take and when to take them. It should help you know what to do if you don't feel well. The plan should tell you when to call your doctor and when you need emergency care.

Breathe easy. If you have asthma, talk to your doctor about getting an asthma action plan. If you already have an asthma action plan, make sure it's up-to-date and that you are using it.

Flu shot

Fight the flu

It's time for your annual shot

It is important to get a flu shot every year. It is recommended for everyone 6 months and older. Here are 3 reasons why:

1. It protects you from getting sick with the flu.
2. If you do get the flu, it will help make the symptoms less severe.
3. It also protects your family from getting the flu. When everyone gets the flu shot, it makes it harder for the flu to spread.

Get your flu shot today. There is no cost to you to get a flu shot. We have an online tool that makes it easier to schedule one. Visit myuhc.com/findflushot. The location you choose must be within Missouri to be covered under your health plan.
